Energy Saving LED  
Retro-Fit Gear Trays

---

**Your solution to upgrading T8,  
T5 & 2D fluorescent lighting to  
energy saving LED alternatives.**

**As part of our retro-fit range  
Aether have designed a selection  
of LED gear trays that will  
enable a simple, fast, cost  
effective method of converting  
your existing fluorescent gear  
trays to LED alternatives.**

# ENDURANCE

BY AETHER LIGHTING

In addition to the supply of retro-fit gear trays we can provide complete lighting fittings suitable for prison use, many can be adapted for use in Anti-Ligature environments from our Endurance range.

# The Aether Retro-fit Family

Each retro-fit gear tray is designed to suit a particular lighting fitting that is very likely to be installed in a typical prison, whether built in the recent past or many years ago. We like them so much we gave them all names and created our very own retro-fit family!

In most instances simply remove the front cover, take out the existing gear tray and replace. No wiring will usually be required. The new LED gear trays will fit in exactly the same way as the old unit.

The following are the most commonly installed lighting fittings in UK prisons, and to order or request a quotation just ask for them by name.

## Monitor II - Mick

## Tuscan Trunking - Thomas

## Parkalux - Paul

## Circo - Saeed

## Monitor T5 - Molly

## Quadrant - Bob

## Parkalux T5 - Poppy

## Pantheon - Pritti

## Cell Lighting

You are likely to have Uni-Cell units installed within your prison. We can provide retro-fit gear trays to suit.

If you have other fittings within your buildings we will be happy to provide the correct gear tray to suit
